Design system

The Filex design system is built around a compact eight-point spacing grid, a single sans-serif typeface and a restrained palette. Every component in the web application is derived from these tokens.

Colour

Primary blue 2563EB is used for actions and selection. Green 10B981 signals success, amber F59E0B warnings, and the neutral scale from F9FAFB to 111827 carries all text and surfaces.

Typography

Headings use the bold weight at 24, 18 and 15 pixels. Body text is 14 pixels with a 1.5 line height. Monospace is reserved for code previews and file paths.

Logo

The logo is a folded-corner square with a bold F. Keep clear space equal to the height of the F on all sides and never place it on a busy photograph without the white container.
