Onboarding Guide

Your first two weeks at Filex

Filex Demo Workspace

Internal document · July 2026

- Day one
- Week one
- Week two

Day one

Collect your laptop, join the team channels and read the Engineering Handbook. Your onboarding buddy will walk you through the local development setup and the demo workspace.

Week one

Pick a starter issue from the board, ship it behind a feature flag and write a short note about what surprised you. Sit in on at least one customer call with the support team.

Week two

Join the on-call shadow rotation and read the last three incident reports. Meet with product to review the project roadmap and understand which epics you will be contributing to.
