

Marketing Brief

Cloud 3.0 launch campaign · Q3 2026

Objective

Announce Cloud 3.0 to existing workspaces and win 40 new mid-market customers by the end of Q3 2026. The release headline is the new admin overview; the supporting story is faster previews and safer share links.

Audience

IT leads at companies of 50 to 500 people who still run an on-premise NAS, and design or agency teams who share large files with clients every week.

Key messages

• One tab for every file your team owns, whatever the storage backend.

• Previews for documents, photos, video and code without downloading anything.

• Share links with a PIN and an expiry date, and an audit log behind them.
